SAVING THE WORLD FOR FUTURE GENERATIONS

Small shifts, Big Impact.

Acuflex Global makes eco-friendly living easy, so everyone can shift to a more conscious lifestyle.

Today, plastic wastage is growing at an annual rate of 9% with about 91% of plastic not being recycled. This is damaging our ecosystem in more ways than we can comprehend. To control this, we need to make a conscious shift towards eco-friendly and sustainable packaging that will not harm our environment and marine life.

It is important to use eco-friendly packaging to limit the negative impact we have on our environment. Many people don't think twice before throwing away single-use plastic, but these items can easily take up to 400 years in landfills to biodegrade, leaving behind a considerable amount of carbon footprint and converting into nanoplastic.

“

We don't inherit the earth from our ancestors,
we borrow it from our children.

- David Brower

WHO WE ARE

We are the leading supplier of eco-friendly, biodegradable & compostable products.

ACUFLEX is a sustainable company providing customized solutions with a wide range of products to help replace the use of single-use plastic. We are headed where the future lies – towards sustainability.

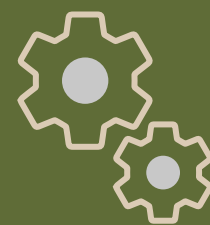

SUSTAINABLE
Made from renewable resources

BIODEGRADBLE & COMPOSTABLE
Providing a wide range of biodegradable & compostable packaging for various needs

RECYCLE REUSE REDUCE

FULLY CUSTOMIZABLE
Customizable eco-friendly packaging to suit all your preferences

The best way to live in the future is to **CHANGE** it.

OUR VISION | MISSION

Our vision is to create a completely sustainable alternative market for our environmentally enlightened consumers.

**We care.
We are responsible.
We create a sustainable impact.**

OUR CORE VALUES

in all our aspects**

**We are
customer-centric**

OUR PRODUCT OFFERINGS

Our product portfolio ranges from 100% compostable to all sustainable materials reusable bags. These are some of the products we offer.

Compostable and Biohybrid resin

Grocery bag & t-shirt bag

Mailer bags

Garbage bags

Eco-friendly baby diapers and pants

Eco-friendly sanitary pads and liners

Water soluble bag

Sustainable Tableware

Pet waste bags

100% compostable plantation bags

Reusable bags

PP Woven and non-woven bags

Specimen bag

Courier bag

D-cut carry bag

Sustainable customized tableware hampers

OUR ASSOCIATIONS

We collaborate and associate with leading manufacturers of sustainable packaging materials.

Based in Melbourne, Australia, SECOS Group (Cardia Bioplastics) develops and manufactures biodegradable and compostable resins, range of packaging products and high-quality cast films for the global packaging and plastic products industry.

We associate with SECOS Group not only to deliver the best, but to innovate and lead the market with our best foot forward for the benefit of the planet.

The company holds a strong patent portfolio and its growth is fueled by the global trend towards sustainable packaging. Thus, in harmony with our mission, together we develop bespoke compostable solutions for a wide range of applications.

X

RECOGNITION

Our company, Acuflex Global, has been awarded among the 10 BEST STARTUPS IN UAE FOR 2022 by Siliconindia. We are delighted to present our publication featured in the magazine with a few insights into how our journey began, our mission, our goals for the future, and our Co-founders take on sustainable packaging.

Acuflex Global: Transforming Consumer Packaging through Sustainable Solutions

Acuflex is one of the leading suppliers of eco-friendly, biodegradable & compostable products

Plastic wastage is growing at an annual rate of 9 percent with about 91 percent of plastic not being recycled. Plastic waste is damaging our ecosystem in more ways we can comprehend. Studies suggest, approx. 100,000 animals die from plastic entanglement each year and humans ingest about 5 grams of plastic every week due to the plastic that travels up the food chain.

With a rise in the e-commerce industry, conscious changes in consumer demands and a boom in sustainable packaging, Acuflex Global - a Dubai-based sustainable packaging solutions company - anticipated the need to go green and create disruptive changes in packaging to thrive against this increasingly competitive landscape.

Talking about the slow yet steady positive change that the industry has been witnessing, Rakesh Narsinghani co-founder says, "The global bioplastics market has witnessed a steady growth in the past two decades. Seeing this landscape and the need of the hour, Acuflex Global has stepped in at the right time to contribute to this positive change. Our aim is to create products free of allergens and toxins that do not contain harmful plastics and reduce the use of resources significantly. They must positively impact brand image, thereby increasing consumer willingness to pay more for products with sustainable packaging and make that conscious switch."
